About me:

A go-getter who doesn't give up no matter what happens. I am also eager to learn and careful. My passion is programming applications. I find IT security very interesting. This can also be seen in the internships that I have completed. Also I would love to become an ethical hacker.

Relevant Work history: Graduation intern IT Security

Kings of IT · nov. 2020 - okt. 2021

Finding the best SIEM (Security Incidents and Event Management) monitoring tool for SMB employees. This concerned companies have between 25 and 75 employees. Who use BYOD (Bring Your Own Device) laptops with the Windows or MacOS operating system. Parts: determining requirements, package selection and configuring the best SIEM tool on the server with Windows and MacOS Clients.

Full Stack Engineer

Cyso · jan. 2018 - nov. 2019

Plan for reporting updates and patches to customers. Worked on software in which CVEs (Common Vulnerabilities and Exposures) were automatically linked to the systems put into use at Cyso. This is written in Python and Perl.

IT Security Officer

Cyso · jan. 2018 - nov. 2019

Making decisions about IT security and continuing my internship assignment.

Intern Security & Development

Cyso · sep. 2017 - jan 2018

Designing and developing a system for Microsoft's CVEs and the software associated with those CVE's and the hosts that have these CVE's in their software using Python.

Intern

Security · sep. 2016 - dec. 2016

Sniffing internship, penetration testing of an app and gathering information about customers

Work history: Sales employee

DEEN supermarkten · sep. 2013 - feb.
Work in the bread department

Hospitality employee

Duincamping De Lepelaar · jul. 2013 - sep.
Washing up, serving and preparing staff meals

Education and degrees:

Computer science

Hogeschool InHolland · sep. 2015 - jan. 2022

This course has given me a foundation in designing, modelling and developing applications that are connected to databases. The minors I followed were:
eHealth, Big Data, cloud and security.

Propaedeutic exam: jun. 2016 Degree: jan. 2022

Digital Media & Communication

Hogeschool Utrecht · aug. 2014 - jun. 2015

In the first year I learned how to develop a communication system. The aspects that are important are research, advice, design, construction and application. A number of courses I have followed are web programming, evaluation research, marketing & e-business and web design. Just before completing my propaedeutic year, I also found programming much more fascinating than designing communication systems.

Propaedeutic exam: jun. 2015
